WAKE ISLAND, KH9. Jake, N6XIV/KH9 is QRV from Wake Island until around mid-September on 20 metres around 0700 to 0900 UTC. QSL via K2FF.

---

## **Space News**

The last two Amateur Radio on the International Space Station (ARISS) antennas were installed recently. The installation was part of a task that began last January when the first two antennas were attached to the ISS. two members of the Expedition 5 crew installed the VHF-UHF flexible-tape antennas to the ISS Service Module.

Installation of the new ARISS antennas on the Zvezda Service Module makes it possible to operate two separate amateur radio stations aboard the ISS, one for VHF operation and the other for 70 centimetre operation. Similar flexible-tape antennas for VHF-UHF and for HF were installed last January but there is yet no amateur HF equipment on board the ISS.

Frequencies for the International Space Station are as follows: Region 1 Voice uplink 145.200 MHz FM & downlink 145.800 MHz FM. Packet uplink 145.990 MHz FM & downlink 145.800 MHz FM.
